THE WONDERFUL HEATHEN.

Extraordinary Success of the Chinese as Agriculturalists.

From the Alia California.

A year ago a man in San Francisco sold a lot of land in a then unbuilt western suburb. A Chimaman had been using it as a garden. The land was sanity, and had no more than 390x250 surface. The Chinaman, therefore, had the full use of but about two and a quarter acres. For this speck of ground he regularly paid \$75 a month, and he lived on it with an assistant. He used the land to grow vegetables, which he sold in Chimamen to be peddled through the city. Despite the high rent, he was making money. The Rev. Mr. Vrooman.

TUCSON, ARIZONA

BELOW IS A CUT OF THE TERRITORIAL RENOWNED CHARLES F. HOFF, COMMONLY known as HOFF, of TUCSON. Mr. Hoff is Manufacturers' Agant and Merchandise Broker, with headquarters at Tucson. He is the gentleman that has agitated the windmill question to much, the results of which are being seen all over the Territory, and which is turning the barren deserts into blooming gardens.

THE AERMOTOR WINDMILL

Think of it: the wheel comes down to you.

The ÆRMOTORS have from 4 to 16 luch strokes. Three revolutions of the wheel to one
Stroke of the pump allows it to start upeasier under a heavy lead, and runs when other wheels
are idle, not being "quite" sufficient wind to run other mills. The wheel itself being so LiGHT,
runs so much faster when started, and thus gains more in speed than it loses in the stroke. But
these are only a few reasons why the ÆRMOTOR is superior in Power, Construction and Durability to all other wind-motors. However, so far as the power of the wheel is concerned, the greatest

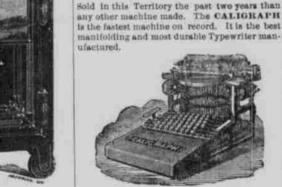

gain in power is due to the structure of the wneel itself. To specify ALL the reasons for this would be too tedlous. Suffice it to say that this claim is based on numerous dynamometric tests on more than sixty different wheels, and that the ERMOTOR has been submitted to long and applied practical tests, in conjunction with the leading wind-motors of the country, and it has been proven by actual trial and measurement that the s-foot Steel ERMOTOR will pump more water in the same time, in any kind of wind, and will do the same work in lighter wind than the best of 10-foot wooden wheels made. The ERMOTOR WIND ENGINE, without exaggeration, is the greatest invention of the nineteenth century, and every home in Arizona should have one, as a home without a windmill is like a library without books, a home without a soul. CHARLES F. HOFF, Agent, Tucson, Arizona.
